

SAMIEN BELL

Canadian Citizen (Fluent in French) | [LinkedIn](#) | [Personal Website](#) | s8bell@uwaterloo.ca | 437-344-1932

SUMMARY OF SKILLS

- **Front-End Development:** 1 year of JavaScript and HTML/CSS, leveraging Bootstrap to develop 5+ websites designed for optimal user experience while being fully responsive. Hosting my personal website on the Internet.
- **Back-End Development:** 3 years of Java, developing applications and leading teams through the software development life cycle. Experienced in Linux, using Bash for shell scripting, and system software development in C/C++.
- **Data Analysis:** 2 years of Python, leveraging libraries such as NumPy, Pandas and Matplotlib to manipulate and visualize large datasets. Utilized SQL (MySQL, SQL Server, SQLite) to clean, aggregate, and extract data for insightful analysis.

EDUCATION

University of Waterloo

Waterloo, ON

Bachelor of Computer Science – Cumulative GPA: 96%

April 2028

- **Coursework:** Object-Oriented Software Development (C++); Elementary Algorithm Design and Data Abstraction (C); Logic and Computation; Tools and Techniques for Software Development (Linux, Bash); Principles of Computing (Python); Statistics; Probability; Calculus III; Linear Algebra II; Quantum Physics

WORK EXPERIENCE

Humber Polytechnic

Toronto, ON

Math Tutor

January 2025 – April 2025

- Collaborated with a team of tutors to tutor 100+ university and college students in various disciplines of mathematics, leading to a 30% increase in student grades.
- Utilized LaTeX to develop concise financial math learning resources for future tutors to efficiently grasp the content.

Outlier

Remote - San Francisco, CA

AI Trainer

May 2024 – December 2024

- Train various large language models to solve complex math problems by providing step-by-step analytical feedback when necessary, resulting in the advancement of AI's mathematical capabilities.
- Executed flawless 5-star tasks by meticulously crafting prompts to realign the model's mathematical process, resulting in a promotion to review tasks further down the project pipeline.

LEADERSHIP EXPERIENCE

Team Leader | WATonomous – University of Waterloo

January 2025 – April 2025

- Organized and led a team to develop navigation intelligence for a simulated robot in C++ using ROS2 and Foxglove, resulting in admission into the WATonomous design team.
- Developed a simulation for the Rover Autonomy sub-team using Gazebo and Foxglove in preparation for the University Rover Challenge in Utah.

Musical Director | Unaccompanied Minors – University of Waterloo

September 2024 – December 2024

- Led an Acapella group of 16 in preparation for several concerts and gigs by arranging songs and directing weekly rehearsals, resulting in 200+ concert tickets sold.
- Conducted auditions for 50+ prospective members by analyzing pitch, tone and blend to construct the perfect group.

Club Founder | GeoGuessr Club – Ursula Franklin Academy

November 2021 – June 2023

- Founded my high school's GeoGuessr Club, where students come together to enhance their geographical knowledge and work together to identify locations around the world in the online educational game GeoGuessr.
- Led weekly sessions for 20+ people by designing and presenting informative slideshows.

PROJECTS

Chess Knight Movement Simulator | Python

December 2023

- Developed a recursive algorithm with random number generation to model the movement of a knight.
- Conducted Monte Carlo simulations by running 100,000+ trials to estimate the average number of moves needed for the knight to reach a target square.

GetAway Guru | Java, Swing

February 2023 – June 2023

- Developed a GUI travel recommendation program, implementing a database with 100+ destinations.
- Led a group of 5 through the software development life cycle, resulting in an A+ grade.
- Designed an algorithm to recommend destinations for users based on their previous logged trips using a HashMap.
